

## Employers' network

With youth unemployment in Hong Kong higher than in all other age groups, the Youth Employment service unit at the Federation works to mobilise businesses and corporations in the effort of helping young people to find jobs. The network is a main supporter of HKFYG' youth career expos and contributes in other ways such as in-service training and mentorships.

Your company or organization can help by

- offering youth placements
- offering training and re-training to enhance young people's job skills
- becoming mentors of young people
-
